

# FLEET MANAGEMENT FOR CONSTRUCTION

*Stay Secure, on Time and on Budget*

Construction companies face many challenges, such as operator safety and protecting high-value equipment from theft. Learn how UScellular™ fleet management solutions with AI-powered cameras, GPS tracking and next-gen technology can help boost security, increase safety at the worksite, and combat rising fuel and maintenance costs. Plus gain real-time insight into equipment location, state of operation and remote engine diagnostics

## OPTIMIZE FLEET OPERATIONS

- Detect battery drain
- Track equipment in zones
- Predictive maintenance
- Includes clock in / clock out
- Digital form integration

## DO MORE WITH YOUR DATA

- Maintenance management
- Asset tracking
- Collision prevention
- Fuel management
- In-cab driver feedback

## BOOST PRODUCTIVITY AND CONTROL COSTS

- Improve asset utilization
- Live tracking of fleet vehicles
- Operator coaching tools
- Accurately cost jobs
- Reduce labor costs and overtime

UScellular partners with the best in fleet management solutions to help you manage costs, material usage and compliance.
