

## PROPANE TANK LEVEL MONITORING

*A Secure, Accurate and Affordable Way to Optimize Your Operations*

Amid supply chain issues and driver shortages, propane companies may be challenged to provide the highest level of customer service, maintain profitability and keep up with the competitive nature of the industry.

UScellular® Propane Tank Monitoring Solutions can help you level the playing field. Reduce operating costs, improve customer service and modernize your operations with our data-rich solution to ensure you're productive and profitable for years to come.

### *Propane Tank Monitoring Advantages*

#### QUICK AND EASY DEPLOYMENT

Our Propane Tank Monitor hardware installs in a minute and works with all tanks—even bulk tanks.

#### LOCAL SUPPORT

UScellular's team of local experts support and guide you from pilot to production.

#### FAST AND RELIABLE NETWORK

Count on a nationwide network for secure cellular connectivity from each monitor to your dashboard.

#### KEY BENEFITS

- Reduce operating costs
- Reallocate resources
- Automate manual activities
- Increase customer satisfaction and retention
- Maintain a competitive advantage in the marketplace

### *How It Works*

Tech installs rugged endpoint

Endpoint collects level and usage data

Data is transmitted via cellular network

Actionable data delivered to cloud-based portal

### *The UScellular® Advantage*

UScellular provides a powerful nationwide network to ensure your monitors stay connected, no matter the location or environment. You'll receive only one bill for all your UScellular services, and we stock Otodata monitors, eliminating the need for multiple vendor relationships.
