

U.S. Cellular® solutions partner GPS Trackit named “Best Value” for fleet management service

There are plenty of Internet of Things (IoT) solutions out there promising to deliver outstanding service. Choosing the right IoT partner is an important decision that can make a significant impact on your business.

U.S. Cellular partners with the best to bring its customers unparalleled business solutions. In fleet management, that means delivering a solution that streamlines operations and comes backed by the support you need for seamless integration.

We have chosen GPS Trackit as a business partner to assist us on our mission to deliver best-in-class fleet management solutions. Recently named “Best Value,” for GPS Fleet Tracking Software and Systems by Business News Daily, the company stood out from the dozens of options evaluated by an impartial panel for a number of reasons. In fact, Business News Daily had only great things to say about its services.

“After conducting extensive research on GPS fleet tracking services, we recommend GPS Trackit as the GPS fleet tracking service with the best value in 2019.”

— Business News Daily

Extensive services and solutions

Every business has its own unique needs. That's why GPS Trackit offers a complete package of fleet management services for a reasonable monthly price. The fleet management solution was praised for its wide variety of capabilities, including:

Geo-fencing — Get an alert whenever a vehicle enters or leaves a defined area on your map, such as an office or warehouse.

Live alerts — Set up real-time alerts that keep you updated on your fleet at all times.

Mobile-friendly software — Keep tabs on your fleet while you're on the go.

Fuel optimization — Analyze and optimize routes with detailed fuel performance results that help manage fuel costs.

Maintenance reporting — Monitor brakes, coolant, cruise control, ignition, oil pressure and other important issues with comprehensive vehicle diagnostic reports.

Compliance — Electronic logging features make compliance easy.

GPS Trackit offers a large suite of fleet management services, including drive and idle time tracking, vehicle status and nearly 30 other reports that deliver actionable insights.

Installation made easy

Installing and implementing a fleet management system without an IT department can feel overwhelming without the right support. With GPS Trackit, you don't need a skilled IT department. Advanced hardware and responsive software that you can seamlessly set up on your own give your business the best of both worlds.

A reputation for putting customers first

Your business deserves outstanding service to go with great products. GPS Trackit delivers on both fronts. It is accredited by the Better Business Bureau and even received an A+ grade. The fleet management solution is 100 percent upfront about its pricing and offers a variety of plans to choose from, helping you to find an ideal solution for your operations. The company

also provides a dedicated support team to answer any questions via live chat, phone and e-mail.

Flexible options for optimal solutions

There is no minimum vehicle requirement for GPS Trackit's fleet management services, which allows companies of all sizes—from small businesses with just a few vehicles to enterprises with hundreds—to take advantage of those services. The fleet management solution also doesn't require a long-term contract, giving your business even more flexibility.

We're proud to partner with GPS Trackit to deliver fleet management solutions that can help your business increase production and profitability. These specialized solutions are backed by the U.S. Cellular network, purposely built where you do business, in both urban and rural areas.
