

Keep Students Connected With Distance Learning

Keeping teachers and students connected from home is a high priority for every community. That's why your distance learning solutions should be powered by a nationwide, fast and reliable network. With the right devices and network, classrooms can be wherever your teachers and students are.

We know that each school district has unique needs and challenges: large vs. small, rural vs. urban, budget considerations, and Children's Internet Protection Act (CIPA) and other compliance requirements.

So, whether you need **mobile hotspots** or **cellular tablets**, our local Business Solutions Experts can help guide you on which solution is best for your district.

U.S. Cellular® Remote Learning Advantages

Fast & Reliable Network

Our solution is powered on a fast and reliable, nationwide network that works in the city and beyond.

Quick & Easy Setup

Solutions are easy to deploy, allowing you to quickly connect to the network, for reliable internet access to support your remote learning activities.
